### **Milestone:**

- Modern Technology is increasing and optimizing the Performance of the Artificial Intelligences (AI) Model.
- ✓ Fire detection is important in this scenario.
- ✓ Finding the exact location of the fire and sending notification to the fire authorities soon after the occurrence of fire can make a positive impact.
- ✓ We have implemented a fire detection system to detect fire by capturing images.
- ✓ The system uses CNN(convolutional neural network), and image processing techniques.
- In this Project Milestone will be given the Best Solution for the nature of forests using the complete friendly and simple user interface web application to fetch the solution on its own.
- In addition, we are planning to add a valid Module that is Early Detection of Forest Fires. It can give both Artificial and Natural of forest's.

### **Activity List:**

In Project Management Planning is an Important task to scheduling the phrase of the project to the Team Member.

In this Activity can shows the various activity are allocated and Done by the Team Members!

❖ In Project we can Split into the Four Step of Phrases are,

Phrase 1: Information Collection and Requirement Analysis

Phrase 2: Project Planning and Developing Modules

Phrase 3: Implementing the High Accuracy Deep Learning Algorithm to Perform

Phrase 4: Deploying the Model on Cloud and Testing the Model and UI Performance
